Subject: Wind Catcher Energy Connection

Sam: Wonderful to talk with you today. I continue to be very grateful for your leadership on our Regional Haze and MATS approach.

Attached are the press release and one-pager on our new Wind Catcher Energy Connection project. It is, quite simply, the most unique project with which I've ever been associated. We will spend \$4.5 billion – which makes this one of the largest private investments in Oklahoma history – and yet customers' bills will go down!

We filed for state regulatory approvals today and we're very optimistic that the state regulators will approve next Spring, which will allow the project to stay on track.

Please don't hesitate to give me a call if you need more information or have questions.

Best regards,

Stuart
